

# TAKING STEPS TO REDUCE YOUR SCHEME'S EXPOSURE TO BIODIVERSITY RISKS

## NAVIGATING NATURE RELATED RISKS

More than half of the world's GDP is believed to be moderately or highly dependent on nature<sup>1</sup> – this means many companies will be exposed to nature-related risks. Biodiversity loss and ecosystem collapse is also viewed as one of the fastest deteriorating global risks over the next decade.<sup>2</sup> Nature loss poses a major risk to companies. Integrating nature-related risks into governance decision-making could be key to managing risk and return.
