PMI Qualifications

The PMI is the UK's leading professional body for those working in the field of employee benefits and retirement savings. It supports and develops the experts who are responsible for running the UK's pensions industry and is acknowledged as the body for establishing, maintaining and improving professional standards in every area of pension scheme management, consultancy and trusteeship.

PMI qualifications are recognised for both their depth and their standing within the industry. If you choose a single unit, standalone qualification, or a multi-unit qualification over a number of years, it is recognised by the Pensions Industry as having the depth and rigour to demonstrate the knowledge and expertise of those taking them.

Syllabuses

Each syllabus area is presented in a form which is intended to give an indication of the depth and breadth of knowledge which is required. Each syllabus area is divided into sections with an initial statement, or learning outcome, indicating what is expected of learners and some notes in italics which give an indication of the way in which the initial statement should be interpreted.

The initial statement and notes use key words in heavy type to indicate the depth and/or breadth of knowledge which is required. The key words should be interpreted as follows:

analyse – interpret and examine in detail

define – make clear the exact meaning

demonstrate - explain or prove by reasoning/example

describe - give a detailed account of distinguish - mark the difference between – determine the value

explain - make clear or intelligible; illustrate the meaning of

identify - demonstrate what something is

outline - brief general explanation; summary without detail

understand - comprehend; have a thorough knowledge of

interpret - clarify/explain the meaning of something

This is then further broken down into Assessment Criteria. Assessment Criteria are descriptive statements that provide learners and instructors with information about the qualities, characteristics, and aspects of a given learning task. Fundamentally, they specify clearly the standards that must be met and what evidence will be used to show achievement of learning outcomes.

The syllabus and the examinations for this qualification are based on the law and practice of the United Kingdom as it existed on 6 April the previous year, unless stated otherwise.

To provide a broad introduction to pensions and other related benefits in the UK that is ideal for employees new to pensions, support staff and those professionals working in related fields. It also provides for currency for conversion into a career in Retirement Provision e.g. If holding a degree in an unrelated subject to pensions, the addition of the RPC would act as a 'conversion' qualification.
